

The #1 Product Resource for the Laboratory Market

For more than 46 years, LABORATORY EQUIPMENT has been the leader in providing news on the latest new products and technologies for the lab.

LABORATORY EQUIPMENT is where laboratory professionals turn for news and information on products, technologies and trends for the laboratory. More than 66,000* BPA-audited lab managers, supervisors, scientists, engineers and other laboratory professionals in nearly 48,000** labs rely on the print and electronic products of LABORATORY EQUIPMENT for information about the equipment available to conduct high-performance and cost-effective scientific research.

“LABORATORY EQUIPMENT keeps me up to date on lab equipment and trends, and forms the primary reference when I need new equipment”

Chief Chemist, Vale Inc

LABORATORY EQUIPMENT readers include lab, R&D, technical and QC managers/directors/supervisors; scientists, chemists and engineers; university/college professors and department heads, purchasing and facility directors and other management located in industry, university/college, government, independent, contract, hospital/medical centers and other laboratories.

The publisher, editors, and staff of LABORATORY EQUIPMENT are dedicated to providing print and electronic media for you to effectively promote your products and services and drive sell-through. Our loyal readership turns to us to bring them news of new products in the market and utilizes our products as a resource to assist in making purchasing decisions.

“LABORATORY EQUIPMENT keeps me up to date on the latest technologies and equipment in one convenient publication”

Senior Chemist, Freeport McMoRan Miami Analytical Laboratory
